

Supplement to IDOC BULLETIN, n. 46, August 1976

## IDOC BULLETIN INDEX 1972 - 1976

The IDOC Bulletin is almost four years old. It was started in November 1972 for the purpose of incorporating two former IDOC publications:

the *Catalogue of Documents* and the mimeographed *Quick Communication Service*. The aim of the bulletin, was, at that time, twofold: 1) to be a vehicle of *communication*, 2) to carry *documentation* on current issues.

This meant listing publications and/or reprints of articles and documents with special appeals, reports and summaries, or last-minute notices. The Bulletin could also be used by "voiceless" groups for publication of urgent communiqués, notification of forthcoming conferences, etc. Since January 1975, the IDOC Documentation Department has introduced a new system of classification based on optical computing. This has increased enormously the retrievability of our material, so that we are now able to respond quickly and in exhaustive way to requests for documentation.

This is why, in recent months, the style of the Bulletin has been that of offering specialized information on particular areas (e.g. Philippine or East Timor situations) both in the selection of communication and in focused and more detailed bibliographies.

We hope that our subscribers and friends will appreciate the August issue which contains a complete index of IDOC Bulletins since November 1972.
